CEO's Message

BHAGYA RANGACHAR, CEO

Recently, I had to do a write-up on our entire journey of CLT for the last 22 years. This was meant to be for some research and had to be accurate and academically sound.

Through and through, there was one thread that was coming out consistently, whether we were doing school mid-day meals back in the early 2000 or developing digital teaching resources a decade later or launching mobile APPs in 2020! That the end goal was always to make a difference with each community we served by galvanizing their potential and aspirations for a better future, with our efforts to create learning opportunities.

Through the evolution of many programs and products, we have always kept the user-experience as our key focus- whether it was for students, teachers, schools or other partners that had their own eco-system, and strategy sessions had kept the last mile delivery in mind. Most importantly, we were cognizant of the responsibility and trust placed by our donors to create value for the communities we were serving!

Our customary meeting at the beginning of the year in 2019, had the usual overtone of optimism for the new year, and the comradery for the challenges they had to overcome with the reach of more than 3,000 schools. Our Reach was extended to Hindi-speaking Northern States and we had to flex all our muscles to new ways of doing things, from planning to delivery. With grit and integrity, I am proud to say our team had done it!!

One of the main things that came out of that meeting was to extend our program beyond the confines of formal classrooms that required additional infrastructure to support e-learning. How can our resources reach the teachers and students directly, so they are free to learn at their own time and space?

By December, 2019, CLT had launched two mobile APPS - Jigi and Jigi Jigi, fulfilling the promise we had made to ourselves!!

While numbers were the representations of the overall impact and reach, the human stories were compelling. Teachers were our heroes and agents of change, who would make our dreams become real by transforming every classroom environment into dynamic learning hubs. Teachers were empowered to have the resources they needed at their fingertips to deliver effective classes in STEM. Students were exposed to new ways of learning with the 21st century skills and aspired for better future!!

All of this has been possible because of the valuable collaborations and partnerships and generous contributions from our donors. We pledge to serve better in the coming years with your continued support!

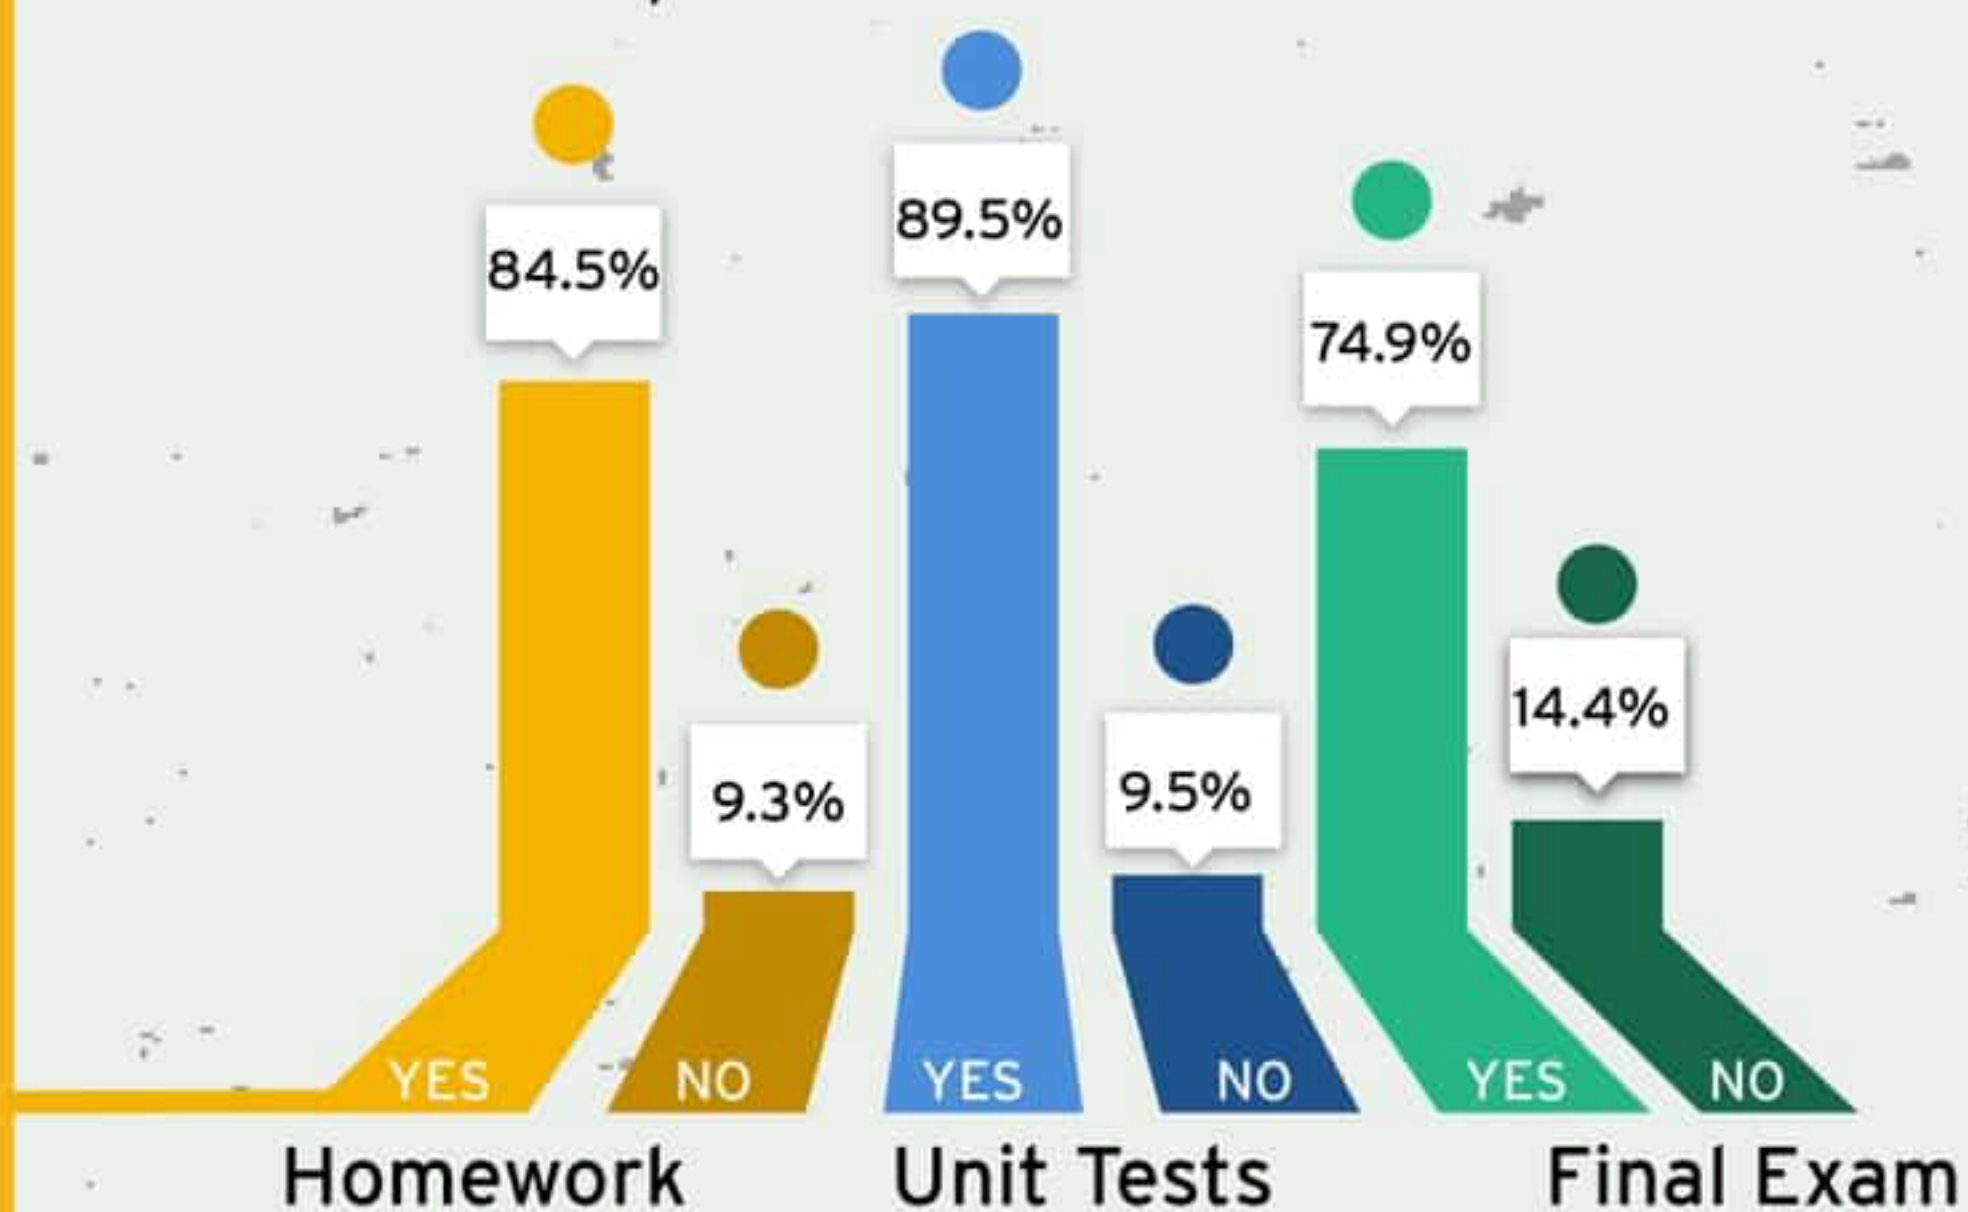

I also take this opportunity to share that Omar Wani, Chief Strategy Officer at CLT who served our organization for 4 years has moved on. On behalf of our entire team, I like to acknowledge his contributions to the growth of the organization and wish him the very best for his future endeavors.

Meet Sathya

- A student who has benefited from e-Patashale

"I was not understanding Chemistry by just reading it, so when I started learning through e-Patashale digital STEM program, it was easier. I understood Chemistry concepts better by watching and doing the experiments.."

Improvement of performance after implementation of e-Patashale

Teachers feedback from Christ University report*

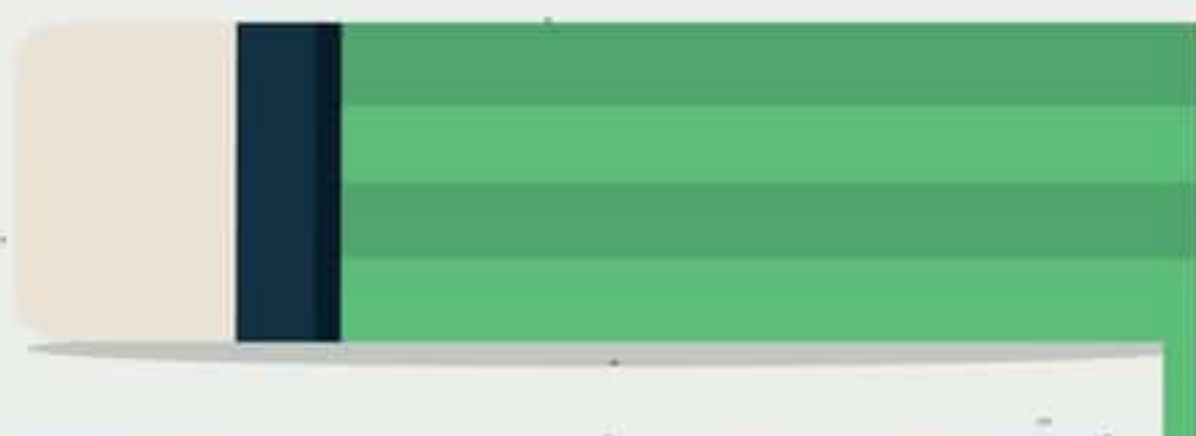

Teachers doing technology mediation

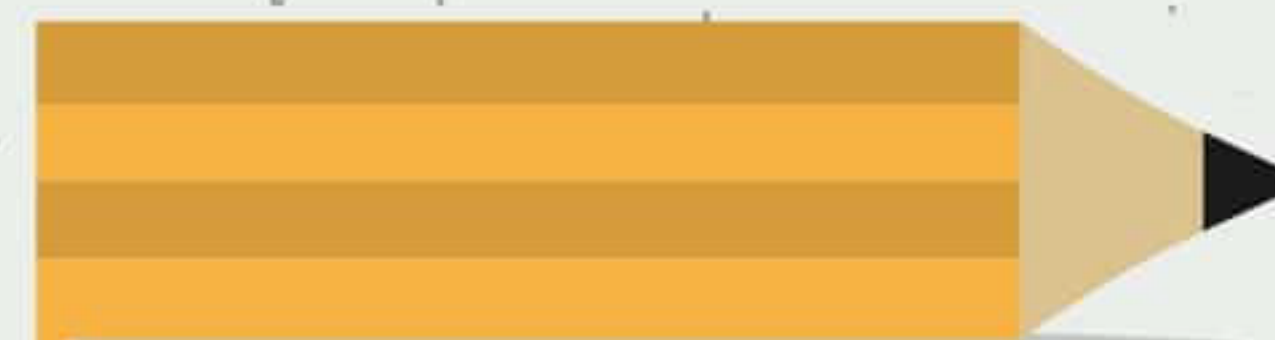

Meet Vedavathi

"e-Patashale helps me remember the concepts better because of the audio visual teaching and hence we are able to do better in our exams..."

Students' performance in class
went up by **95%**

Students' knowledge retention
improved by **94%**

Students' scores in STEM subjects
increased by **84.8%**

Teachers are our Heroes

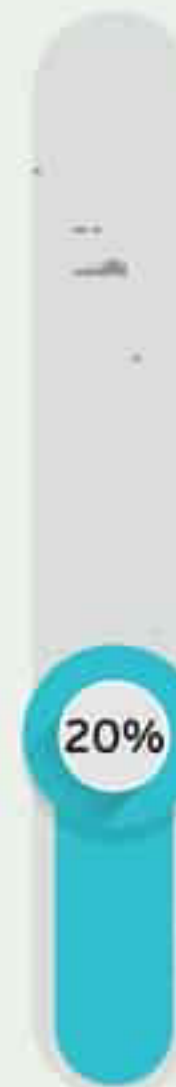

Lesson plans can be easily developed
78%

e-Patashale helps in the process of student evaluation
98%

Enrollment in schools have increased by
83.7%

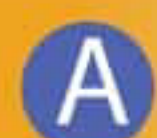

Completion of subject portions with e-Patashale

Optimal use of time in class

1

The app is user-friendly and it helps both teachers and students. Nice initiative for smart education.

Pristal lobo

★★★★★ July 23, 2019

1

Very nice and user-friendly app...very useful for teachers to gain knowledge via technology.

Sunitha Poojary

★★★★★ July 23, 2019

1

It helps teachers by improving their teaching skills through new technology.

Prasanna Kumar

1

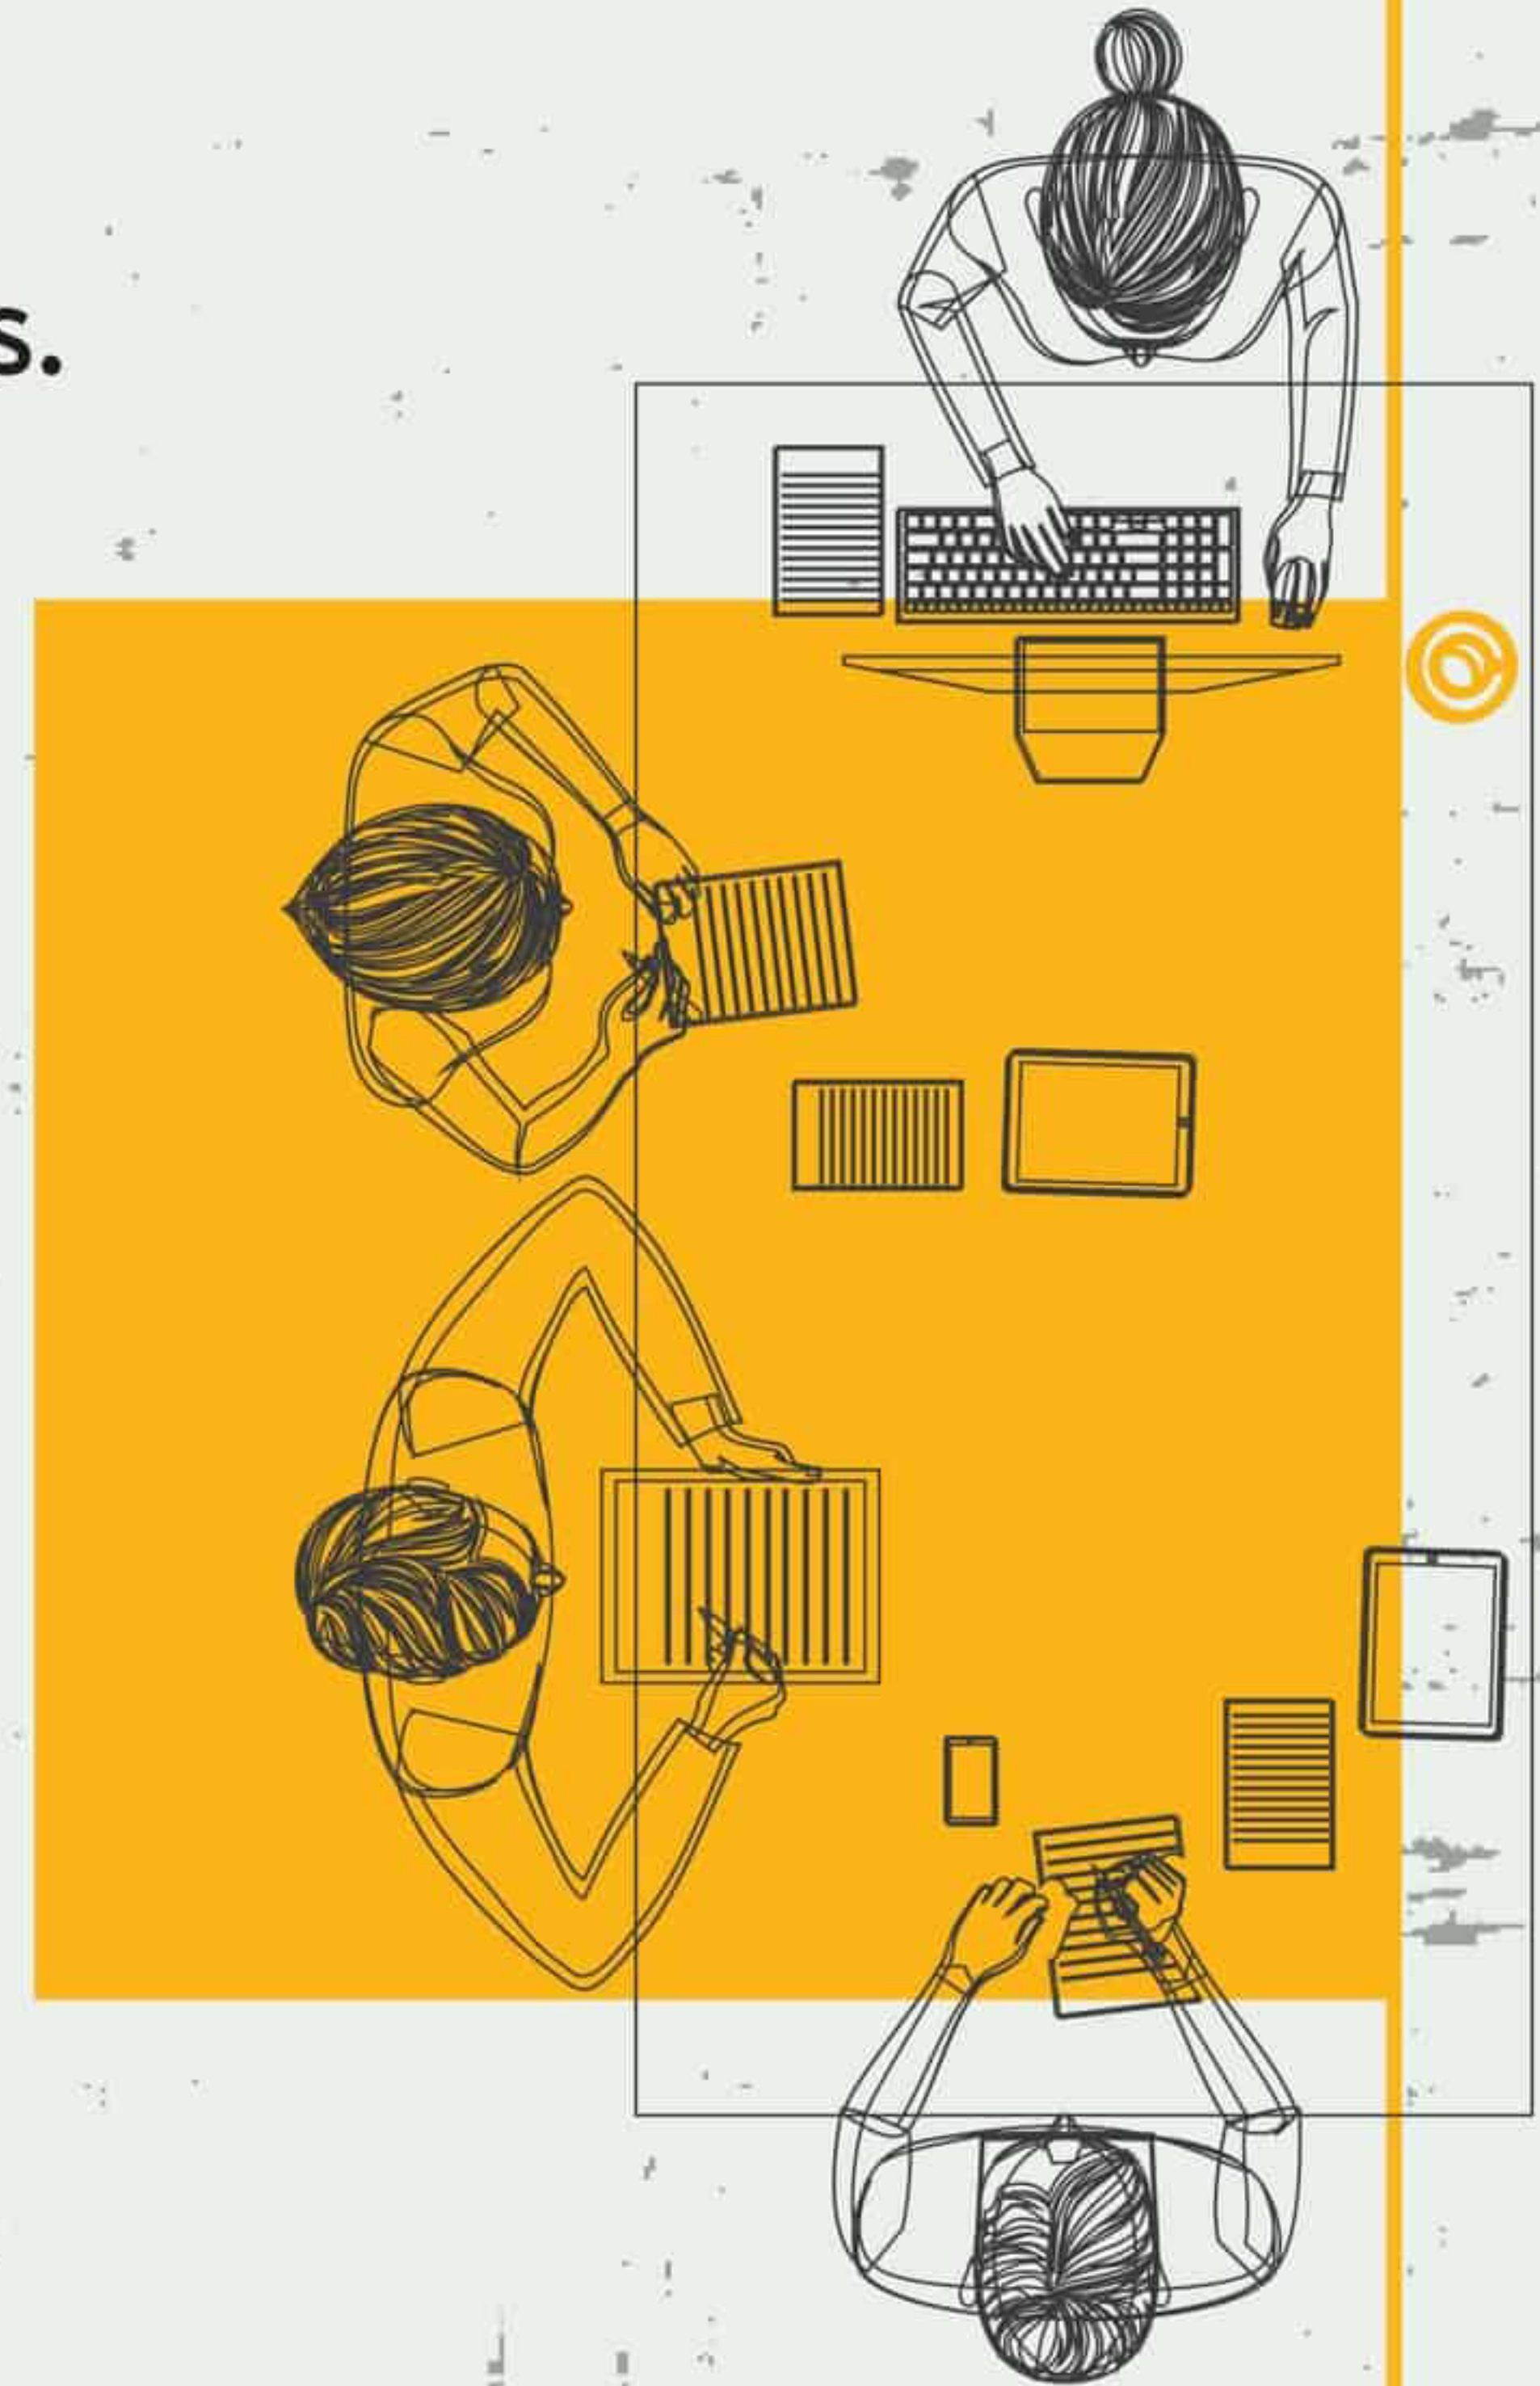

This app is nice.....very helpful to teachers for educational methodologies.

585 more e-Learning labs were added in 2019, thus making the total of **4K+** schools.

Total number of Students served : **2 Million**

CNBC TV

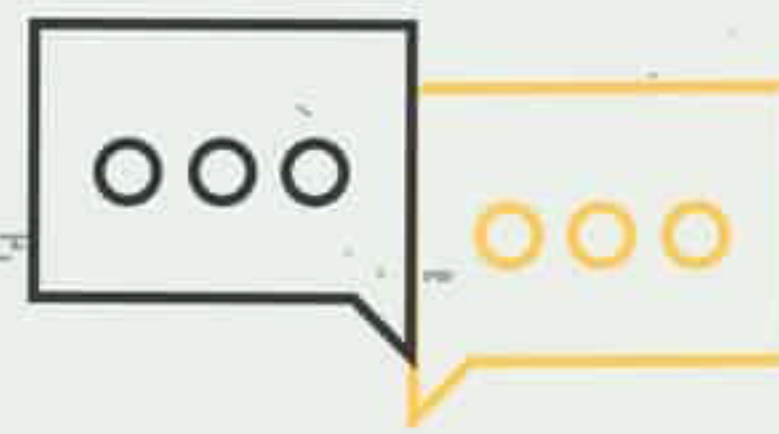

Media Mentions

CLT India was recognized as one of the “Changemakers”, working to achieve the SDG 4 - Quality education for all.

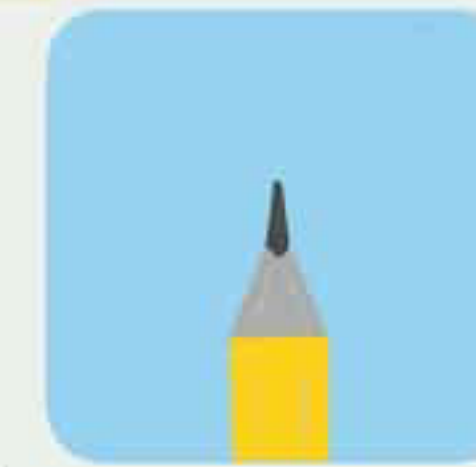

Road Ahead

CLT's journey on mobile platforms kicked-off with the launch of **'JIGI: The Teachers App'**. The free android app has received positive response from the Teacher Community and continues to get new users everyday. With over **15,000** teachers using the APP in 4 months, CLT aspires to reach the Application to over **100,000** teachers by **2021** through our on-going campaign - **'Road to 100K'**.

Students and educational practitioners can now directly access the resources through **'JIGI-JIGI:The Student app'**. The subscription-based mobile application has been launched on the Android Playstore.

We continue to reach more schools that have the need for our resources through strong partnerships.

CLT will actively share study materials on **Diksha** platform, with a vision of making quality resources accessible.

CLT has partnered with **Girls Who Code** to encourage new-age coding among girls.

The **Digital Literacy** program will be extended to **36** schools with **Rotary Partnership**.

Fellows at CLT

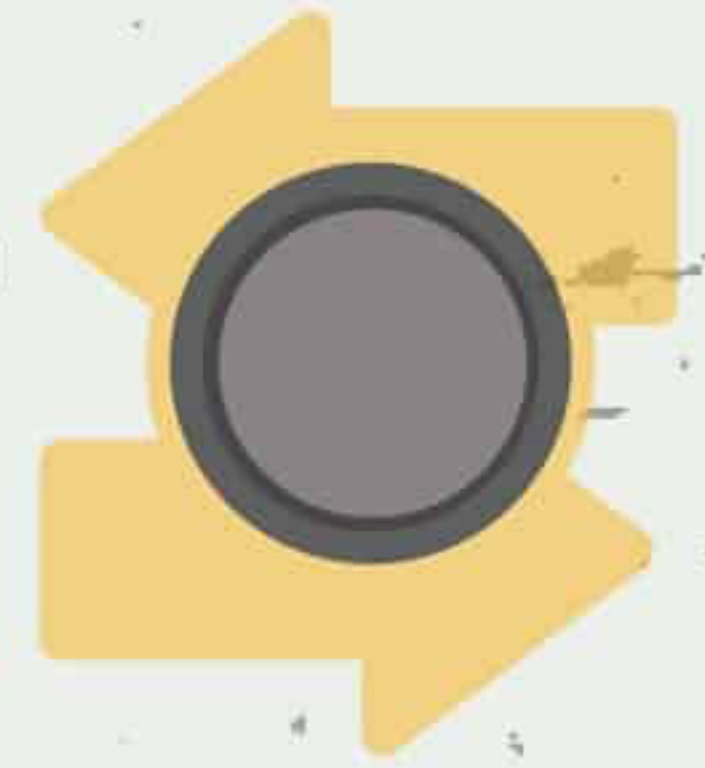

CLT India hosts an annual internship and fellowship program for students and undergraduates from multiple course schedules.

Students are on-boarded as interns and are allotted task-based assignments. Their daily activities are prioritized as per their areas of interest.

The interns work closely with the processes involved in designing and delivery of CLT's programs.

Your contributions in 2019 helped us make a difference in many village communities

We reached a total of **4K+** schools !!!!

585 new schools were added in multiple districts / states, serving a total of **2 million** children.

Teachers' training program continued in many districts and couple of states with the same rigour.

All of our partner schools got content upgradation in 2019.

CLT donated its first Learning Center that was built in the year 2000 back to the Jakkur village community. It has a Science Lab, Library and Computer Lab.

Annual scholarships were provided to highschool and college students under the Kundu Endowment fund for education.

We'd like to thank our partners, collaborators and many individuals for their support.
