"Message from CEO"

The current education system with more than 1.4 lakh schools has been focused on textbooks, exams, and theoretical learning of knowledge rather than the development of skills. The traditional teaching approaches emphasized the student's passiveness and the teacher's activeness. However, the landscape is changing. The National Education Policy 2020 focuses on the need to be more activity-oriented, and have more experiential and practical-oriented education. Organisations like CLT India have been trying to enable this. Our STEM education project – e-Patashale is one way to make learning STEM subjects effective and engaging.

CLT India is led by a team of professionals to overcome the educational challenges of deriving a 'Learning Outcome' with the help of technology and a pedagogical approach. Our tools help pique students' interest in the topics and encourage them to learn more about them. For teachers also, it is difficult to adjust their teaching methods to accommodate dozens of kids at once, and do not guarantee classroom success. Technology, on the other hand, can make it possible. Organisations like ours are actively assisting schools in closing the gap between their instructional techniques and technological breakthroughs. No doubt, Edtech is the way of the future in education.
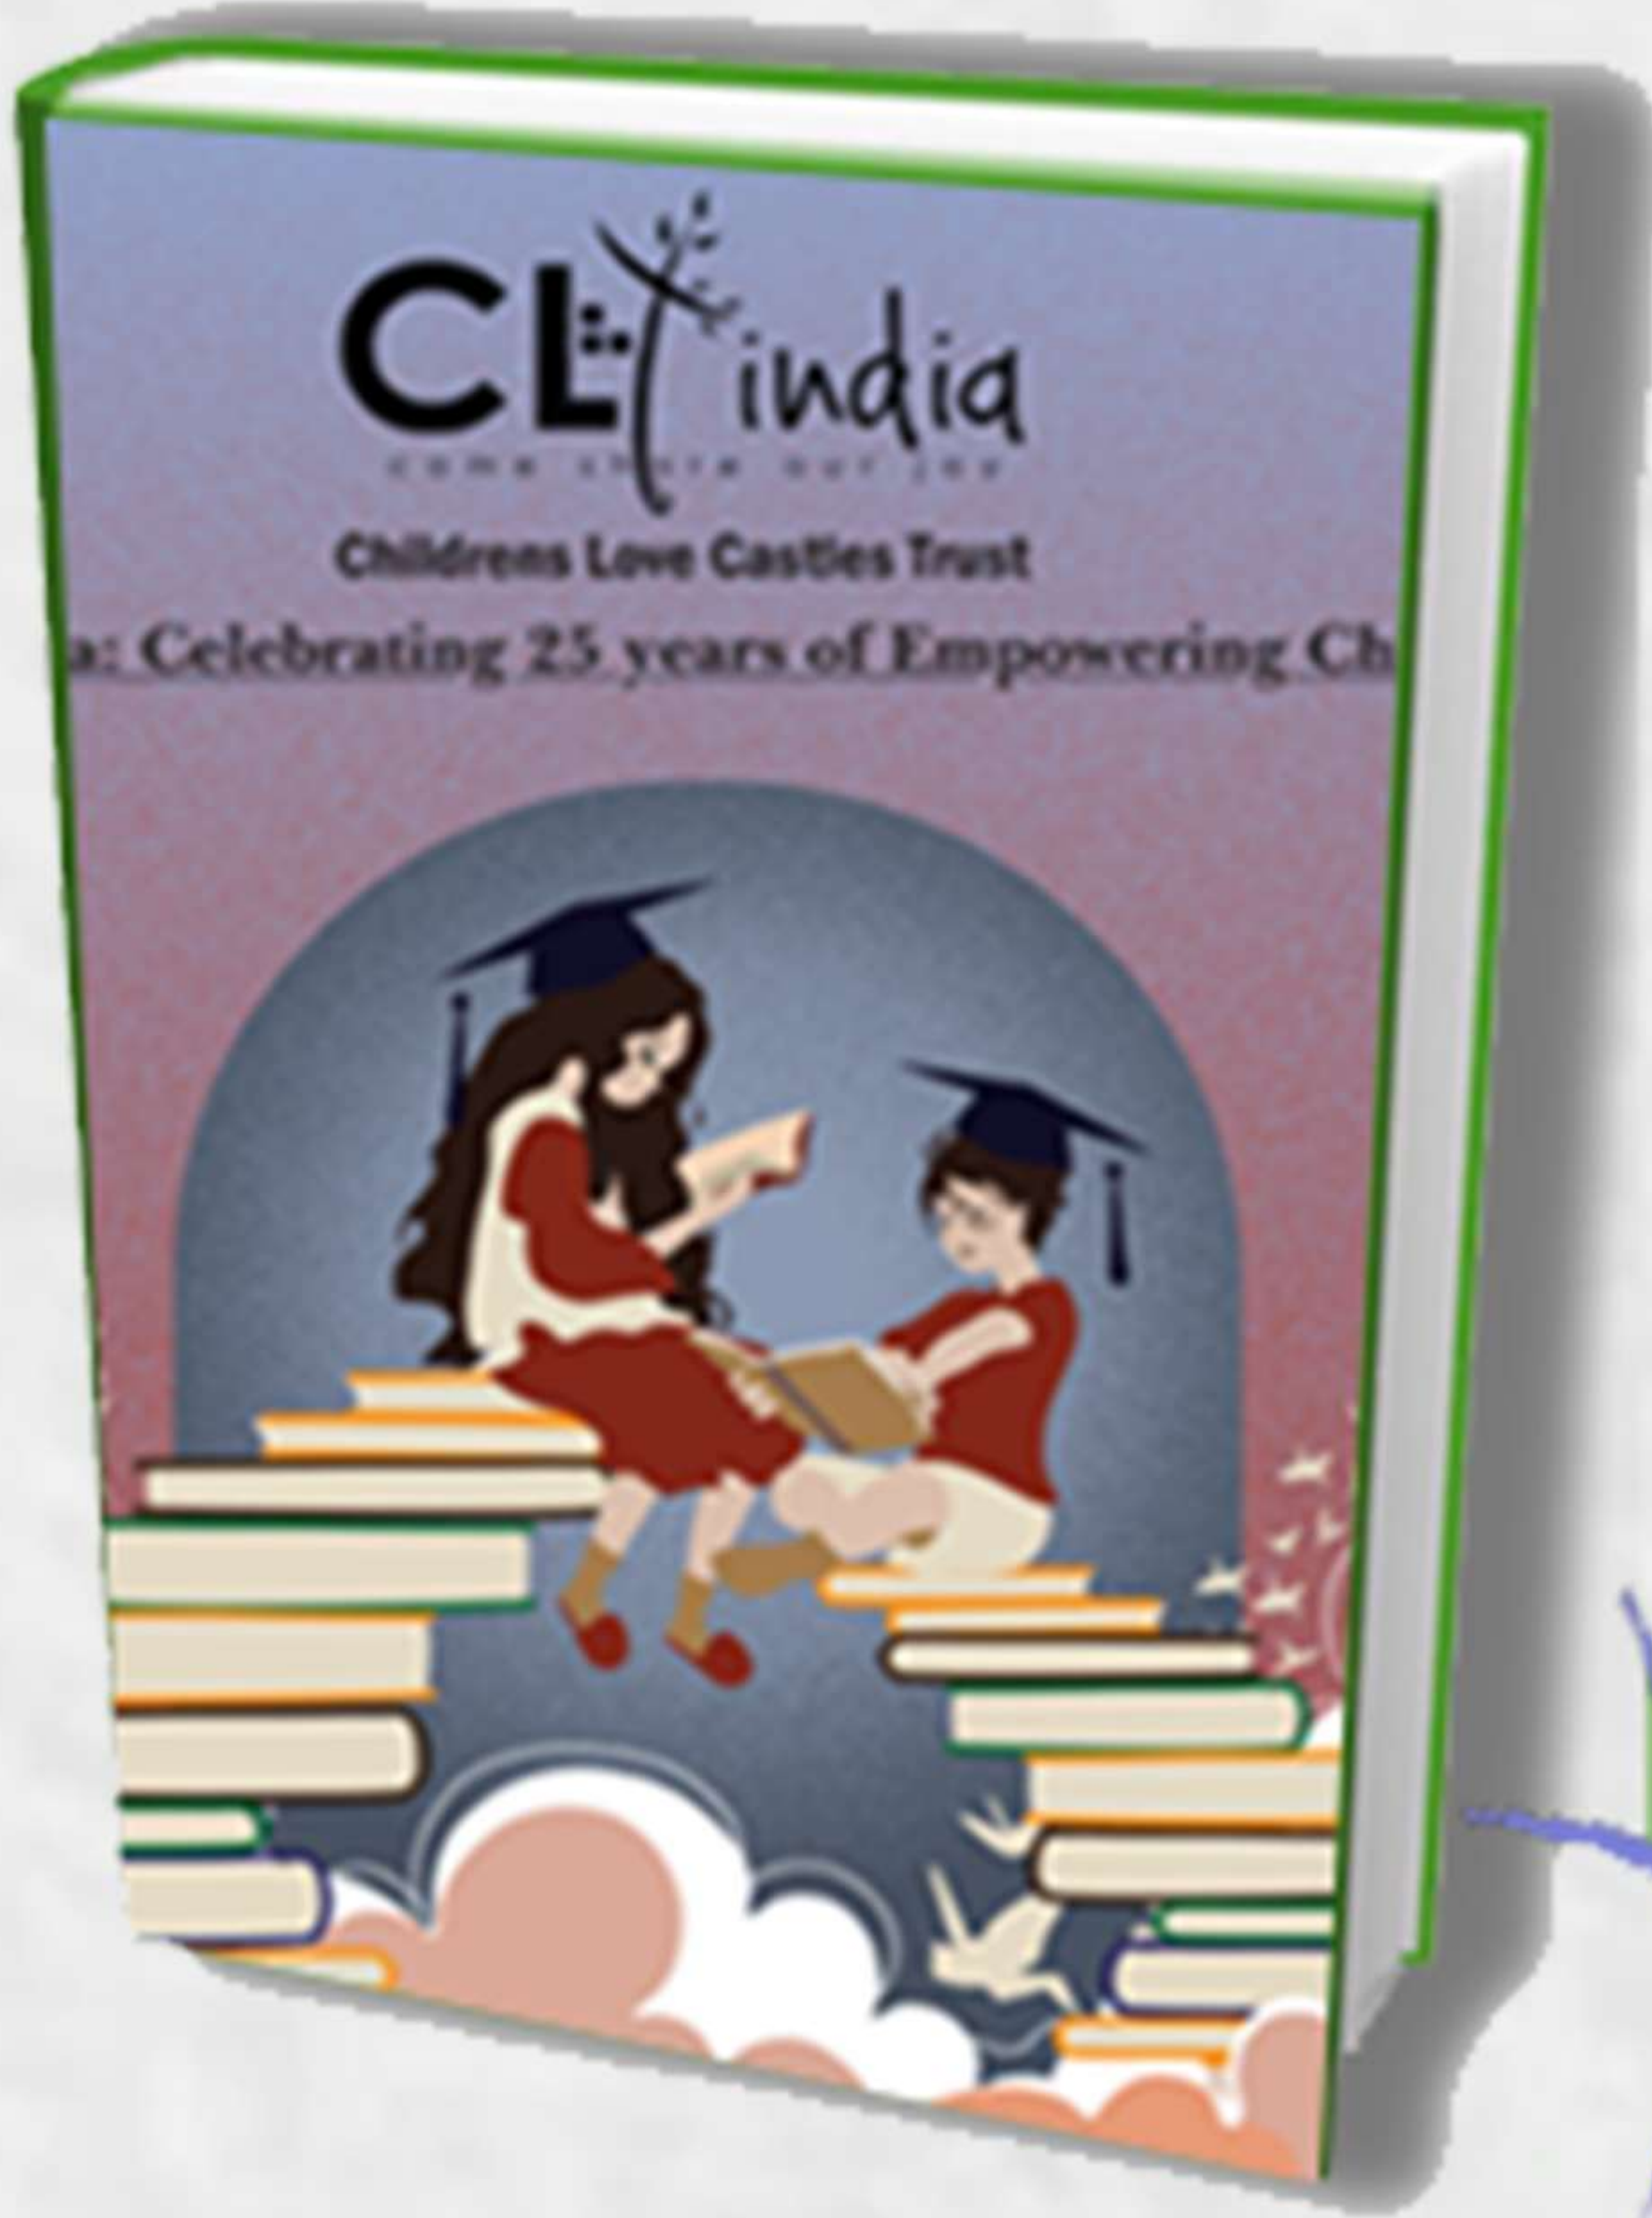

With constant innovation and a drive to mark a global presence, it is encouraging to witness the Indian EdTech initiatives flourish. CLT India has also been playing its role in transforming the education sector. Our focus has always been to improve the learning outcome of every student irrespective of their family background across India. In this endeavor, the CLT India Team is leaving no stone unturned with their innovation, hard work and perseverance.

STEM education is only headed for an upward climb in India, especially because it aligns with the National Education Policy's targets for building critical thinking and problem-solving skills in students. Catering to these I am certain will help Organisations like CLT India in the STEM field grow in the future as well.

- Nixon Joseph
CEO, CLT India

Coffee Table Book

CLT India

Childrens Love Castles Trust

a: Celebrating 25 years of Empowering Ch

We are thrilled to announce the publication of our much-awaited Coffee table book, capturing the remarkable journey of CLT India over the past 25 years. We extend our heartfelt gratitude to everyone who has been a part of this incredible Journey. Our esteemed supporters, donors, volunteers, and staff have been the driving force behind our success and this book pays tribute to their invaluable contributions.

e-Patashale
